

Commons Social Movements Agent-Based Modeling

Multidisciplinary Seminar Natural Resource Development and Social Interactions: New Approaches

October 11, 2018
@Meeting Room 1 (8th floor)
GSID Nagoya University

Natural resource development of the new century necessitates a new perspective, with more sophisticated understanding of social license, local people's involvement, and protest mobilization. This is the concern for any countries and for both social and natural sciences. To move on with this challenge and to explore the possibilities of new analytical tools, we celebrate a special seminar with young and multidisciplinary participants. Our special guests are Dr. Masami Nakagawa from Kyusyu University (Colorado School of Mines), Dr. Anna Suzuki and Dr. Kyle Bahr from Tohoku University, and Ms. Hiromi Makita from Tokyo University. Everyone is welcome to attend and join the discussion!

Session 1: Explaining Social Phenomena by Agent-Based Modeling

14:30-15:00	<i>Agent-Based Modeling for Social Intelligent Systems</i> Masami Nakagawa (Kyusyu University, Colorado School of Mines, Professor)
-------------	--

15:00-15:30	<i>Changing Identity of Citizens : Actor's Interaction in Bolivian Movements</i> Hiromi Makita (Tokyo University, Ph.D. candidate)
-------------	---

15:30-16:00	Discussion
-------------	------------

Session 2: Round Table on Natural Resource Development

16:15-16:25	Introduction
-------------	--------------

16:30-16:50	<i>How to make people interested in local commons - onsen waku-waku project -</i> Anna Suzuki (Tohoku University)
-------------	--

16:55-17:15	<i>Social media as a tool for social license estimation and emerging issue identification</i> Kyle Bahr (Tohoku University)
-------------	--

17:15-17:30	Intervention by Nagoya University participants
-------------	--

17:30-18:00	Discussion
-------------	------------
